

The CMS *handbook*

How the Mjazo team edits the website, screen by screen: pages, services and prices, pictures, Urdu and SEO.

● For everyone who signs in at mjazo.vercel.app/admin
October 2026 · Ghar ka har kaam. Pakka.

EDIT · PUBLISH

Edit the website *yourself*.

Everything on the Mjazo website can be changed at **mjazo.vercel.app/admin**, no code needed: services and prices, every page, menus, the blog, help articles, legal text, pictures, SEO and the Urdu site. Customers see nothing until someone publishes.

The pictures in this handbook are real screens of the admin. The numbered circles on each one are explained in the list under it.

Your first edit in five steps

- 1 **Sign in** at `/admin` with your email. Owners and Admins also type the code from their authenticator app (page 3).
- 2 **Find the thing** to change in the menu on the left (page 5). Or open **Live preview** and click the text you want to edit (page 8).
- 3 **Make your change**. It saves by itself as a draft a moment after you stop typing.
- 4 **Check it** with **Preview**, which shows the real page with your draft, only to you.
- 5 **Publish**. The website updates straight away. Changed your mind? **History** brings back any earlier version (page 10).

In this handbook

Signing in and two-step sign-in	3	Block pages	12
Roles and inviting people	4	The 13 blocks	13
The dashboard and menu	5	Pictures and media	14
Lists and statuses	6	Urdu	15
The editor	7	SEO in the editor	16
Saving and live preview	8	The SEO dashboard	17
Publishing and scheduling	9	Redirects and special text	18
History and the activity log	10	Writing for Mjazo	19
Backups	11	When something goes wrong	20

Three things to remember

- Drafts are private. Only **Publish** changes the website.
- Nothing is lost: every publish is kept in History, and every save you make with `Ctrl S`.
- Use your own account. The activity log records who changed what.

Signing *in*

Go to **mjazo.vercel.app/admin**. New people get an invitation email from an Owner or Admin; open it, and you're in.

The image shows the Mjazo CMS sign-in interface. At the top is a house icon with an 'M' inside. Below it is the text 'Mjazo CMS' and 'Sign in to edit the website.' There are two input fields: 'Email' (callout 1) and 'Password' (callout 2). Below these is a 'Sign in' button (callout 3). At the bottom, there are two links: 'Email me a sign-in link' (callout 4) and 'Forgot password?' (callout 5).

- 1 Your email address.
- 2 Your password, if you've set one (under **Account**, at the bottom of the menu).
- 3 **Sign in.**
- 4 **Email me a sign-in link:** no password needed. Open the link from your inbox on the same device. An Owner's very first sign-in works this way.
- 5 **Forgot password?** emails a link to set a new one.

Links can take a few minutes to arrive. Ask for one, then wait: asking again and again slows them down.

Two-step sign-in

Owners and Admins must use it; everyone else can turn it on under **Account**. You need an authenticator app on your phone: Google Authenticator, Microsoft Authenticator or 1Password.

Setting it up (once)

- 1 After signing in, the admin shows a QR code.
- 2 In the app, add an account and scan it. "Mjazo CMS" appears with a 6-digit code that changes every 30 seconds.
- 3 Type the code into the admin. Done.

Every sign-in after that

- 1 Sign in with your email as usual.
- 2 Open the app and type the code it shows for Mjazo CMS.

Lost your phone? Ask an Owner to reset your two-step sign-in from **People & roles**, then set it up again on your new phone.

Never share your account or your codes. Everyone gets their own sign-in, so the activity log can show who changed what.

Roles, and *inviting people*

ROLE	WHAT THEY DO	PUBLISH	PRICES & SETTINGS
Owner	Everything, including people, roles and restoring backups.	Yes	Yes
Admin	All content, prices, settings and publishing. Can invite people (not Owners).	Yes	Yes
Editor	Edit and publish content: pages, services, blog, help, menus.	Yes	No
Author	Write blog posts and help articles; an Editor publishes them.	Sends for review	No
SEO	SEO fields on every page, redirects and audits.	SEO only	No
Viewer	Looks around and previews; changes nothing.	No	No

Fields your role can't change are greyed out. If you need one changed, ask someone whose role can.

Inviting someone (Team → People & roles)

Team

People & roles

Everyone signs in with their own email, so the activity log shows who changed what.

Invite someone

1

2

3

4

5

- 1 Their email address.
- 2 Their name, as it will show in the activity log.
- 3 Their role. Give people the smallest role that lets them do their job.
- 4 **Send invite:** they get an email with a link to sign in.
- 5 What the chosen role can do.

Below the form, the list shows everyone with access: their role, when they were last seen, and whether two-step sign-in is on. From there an Owner or Admin can change someone's role, switch their access off, or reset their two-step sign-in. Admins can't change Owners.

The dashboard *and menu*

The first screen after signing in. It shows what needs you, and every part of the site you can edit.

- 1 The menu.** Every part of the site, grouped (see below). Your name, **View site** and **Sign out** are at its bottom.
- 2 Waiting for you:** drafts, items sent for review and scheduled changes. Click one to open it.
- 3 Scheduled:** goes live by itself at the time someone set.
- 4 Unpublished changes:** live, with edits waiting to be published.
- 5 Content:** a card for everything you can edit; the same as the menu.

MENU GROUP	WHAT'S IN IT
Pages	Every page (home, about, offers, Plus...), the shared templates for world, category, service and area pages, and Block pages.
Catalogue	Worlds, categories, services, areas and bundles. Prices live here.
Blog · Help · Legal	Posts, help topics and the legal documents.
Navigation	Header and footer menus; buttons and labels used across the site.
Settings	Company and contact details, booking policy, Plus and referrals, feature switches, SEO settings, catalogue rules, search words.
Tools · Team	SEO, Redirects, Urdu translation · People & roles, Activity log, Backup.

Lists *and statuses*

Catalogue items, posts, help topics and block pages each have a list. Click a row to edit it.

- 1 **New service** (New post, New area... in other lists).
- 2 Search the list.
- 3 Show only items with a given status, for example unpublished changes.
- 4 Each item's status (below).
- 5 Drag the handle to change the order the site shows them in.
- 6 Open the item on the live site.
- 7 **Built-in**: nobody has edited it yet; the site shows its original content.

What the status means

STATUS	CUSTOMERS SEE	WHAT TO DO
● Live	This version. Nothing is waiting.	Edit whenever you like.
● Unpublished changes	The live version. Your edits wait in a draft.	Preview, then Publish, or Discard changes.
● Draft	Nothing yet: it has never been published.	Finish it and Publish.
● Scheduled	The live version until the time picked.	Nothing; it publishes by itself.
● Hidden	Nothing: it's off the site.	Restore to site to bring it back.

The *editor*

Every item opens in the same editor: the form in the middle, the buttons at the top, and its status on the right.

How saving works

Changes save as a draft automatically

- 1 Where you are, and the item's name.
- 2 Its status, and who changed it last.
- 3 اردو: show or hide the Urdu fields.
- 4 **Live preview**: the page beside the form (page 8).
- 5 **Preview**: the real page with your draft, in a new tab.
- 6 **History**: every version, to compare or restore (page 10).
- 7 **Publish**: put your draft on the website.
- 8 The English text.
- 9 Its Urdu, beside each English field.
- 10 **Schedule publish**: pick when it goes live (page 9).
- 11 **Discard changes**: throw the draft away.
- 12 **Hide from site**: take the item off the website.
- 13 **Translate the rest with AI**: fill the empty Urdu fields (page 15).

The small grey text under a field explains it, and counters like **16/60** show how long it can be. A red star marks fields that must be filled in.

Saving and *live preview*

Drafts save themselves

A moment after you stop typing, your changes are saved as a draft. Close the tab and come back later; the draft waits for you. If you change something back to exactly what's live, the draft disappears and the item shows as Live again.

Save a version: **Ctrl** **S**

On a Mac, **⌘** **S**. It saves now and keeps this version in History, to come back to. Do it before a big rewrite.

Preview

Opens the real page with your draft in a new tab. Only you see it.

Live preview and click-to-edit

The screenshot displays the Mjazo CMS interface for editing a service. The left sidebar contains the following fields:

- Name ***: 16/60. Value: Full body waxing
- Slug**: 32/40. Value: full-body-wax. From name
- Category ***: Women's Salon
- Short description**: 80/120. Value: Arms, legs, underarms and bac
- From price (PKR)**: 0 shows "On request". Value: PKR 4500
- Duration**: 0 shows "Flexible". Value: 120 min
- Popular**: Shown in "Most booked" and boosted in search.
- Photo**: Shown on the service page and its cards. Without one, the category icon on its tint shows.

The right section shows the live preview of the service page. The top navigation bar includes: **Live preview** (1), **Preview**, **History**, and **Publish**. Below this is a toolbar with: **Desktop**, **Phone**, **English** (3), **اردو**, **Click to edit on** (4), and a close button. The main content area shows the service details for 'Full body waxing' with a price of PKR 4,500. The 'What's included' section lists: A vetted, women-only pro; Sealed single-use kit, opened in front of you; Disposable sheets, towels and clean-up after; All-in price: no visit fee, no haggling. The 'Before your visit' section lists: Pick a spot with good light and a little space; your pro brings sheets and towels; For waxing, let hair grow about 5 mm (2-3 weeks) and skip moisturiser that day; Mention allergies or sensitive skin in your booking notes. The 'How it works' section lists four steps: 1. Book in 2 minutes; 2. We match your pro; 3. She arrives & checks in; 4. Pay after, rate, rebook. The bottom section shows 'Free changes' (Up to 3 hrs before your slot), 'Love it or we redo it' (Tell us within 24 hrs), and 'Pay after' (Cash, JazzCash, EasyPaisa, Raast).

1 **Live preview** on or off. The admin remembers your choice.

3 The **English** or **اردو** page.

5 The real page with your draft. It updates a moment after each change. The icons above it reload it, open it in a new tab, or close it.

2 See the page at **Desktop** or **Phone** width.

4 **Click to edit**: click any text in the preview to jump to its field.

Publishing and *scheduling*

Publish

Puts your draft on the website straight away. Every publish is kept in History.

Schedule publish

- 1 Pick the date and time, in **Karachi time**.
- 2 **Schedule**. The item shows as **Scheduled** and publishes by itself.
- 3 **Cancel** closes the form without scheduling.

A scheduled item shows **Goes live** with the time, and a **Cancel schedule** button. If someone who can't publish edits it in the meantime, the schedule is cancelled, so nothing unchecked goes live.

Scheduling works once an Owner has finished setting it up; the Dashboard says if not.

Submit for review (Authors)

Authors can't publish. **Submit for review** puts the draft on the Dashboard under **Waiting for you** for an Editor to check and publish.

Discard changes

Throws the draft away. The live version stays as it is.

Hide from site

Takes an item off the website, for example a service you've stopped offering. **Restore to site** brings it back.

Two people, one item

If someone else saved the same item while you were editing, you get a warning instead of overwriting their work. Reload, then make your change again.

Before you publish

- Preview on a phone: most customers book from one.
- Prices: check the amount and the "from" wording. Only Owners and Admins can change them.
- If the Urdu site is switched on, check the Urdu too (page 15).

History and the *activity log*

Click **History** in any editor. It lists every publish, every **Ctrl** **S** save, every restore and every import, with who did it and when.

- 1 What History keeps.
- 2 Compare a version with now.
- 3 Restore it as your draft.

- 1 Compare with **what's in the form now**...
- 2 ...or with **the live version**.
- 3 ~~Red, struck-out~~: in the old version. **Green**: newer.
- 4 **Restore** that version as your draft, then publish it.

Activity log (Team → Activity log)

- 1 Who did it.
- 2 What they did: published, scheduled, hid, uploaded, invited, downloaded a backup...
- 3 Details: which fields changed. Use it to answer "who changed this price?".

Backups

Team → Backup. Download one before big changes, and keep it somewhere private: it holds all the site's content.

Backup

Download a copy of all saved content, and bring one back if something goes wrong.

 **Download a backup**

One file with everything people have saved here: every page, catalogue item, post and setting (live, drafts, scheduled and hidden), the media library's records and the redirects. Keep it somewhere safe, for example before big changes. Built-in content isn't in it because it comes with the site; photos and videos stay in storage.

 **Download backup** 1

 **Restore from a backup**

Brings a backup back in. It adds and replaces entries but never deletes anything, and every restored entry gets an "Imported" version in its history, so you can go back.

 Choose a backup file (.json) 2

1 Download backup (Owners and Admins): one file with everything people have saved here.

2 Choose a backup file to restore (Owners only).

What's in a backup

Every page, catalogue item, post and setting people have saved (live, drafts, scheduled and hidden), the media library's records and the redirects.

Not in it: the built-in content (it ships with the site) and the photo files themselves (they stay in storage).

Restoring

Choose the file and check the summary it shows, then pick:

- **As drafts** (recommended): every entry comes back as a draft. The website doesn't change until someone reviews and publishes.
- **Exactly as in the backup**: live content, drafts, schedules and hidden items become what they were. The website changes straight away; you tick a box to confirm.

A restore never deletes anything. Entries that already match are left alone, and every restored entry gets an "Imported" version in its History.

Block *pages*

For a campaign, an event or a landing page: build a new page from ready-made blocks in Mjazo's style. Start with **Pages** → **Block pages** → **New**, give it a name and an address like `/campaigns/eid-sale` (lowercase, words joined with hyphens).

- 1 The page's blocks, top to bottom.
- 2 Drag a block by its handle to move it.
- 3 Click a block to open it and edit its text, pictures, buttons and background.
- 4 Duplicate a block.
- 5 Remove a block.
- 6 Open all blocks at once.
- 7 This page is scheduled: it **goes live** by itself at that time.

Change a published page's address and the old address redirects to the new one by itself.

The 13 *blocks*

Add a block under the list (or the small + between two blocks, when you point at the gap) opens this choice. New blocks start with sample text to replace.

Turn on **Live preview** to watch the page take shape, then Publish.

Hero

A big headline, a short line and buttons, at the top.

Image and text

A photo beside a heading and a few sentences.

Services

Bookable services: ones you pick, a whole category, or the most booked.

Call to action

A closing headline with buttons.

Numbers

Key figures, which can count live (page 18).

Gallery

Several photos together.

Spacer

Extra space, with or without a line.

Text

Headings, paragraphs, lists and links.

Cards

Three or four short points, each with an icon.

Questions

Questions and answers that open on tap.

Promises strip

Mjazo's promises in one band.

Video

A video from the media library.

Enquiry form

Customers leave their number; it arrives with the other website requests.

Tips for a good-looking page

- Each block has a background: **Paper**, **Ink**, **Saffron** or **Blush**. Alternate them, and use Saffron at most once.
- Put `*one word*` of a headline in stars to make it the italic accent: *A headline for **this** page.*

Pictures *and media*

- 1 Search by name, alt text or tag.
- 2 Show only images, videos, 3D models or PDFs.
- 3 **Upload**, or drop files anywhere on the page. JPG, PNG, WebP, AVIF, GIF and PDF up to 10 MB; MP4 and WebM video up to 50 MB; 3D models up to 25 MB.
- 4 **No alt text**: add a description before using it.

Click a picture to open its details:

- 1 **Focal point**: click the important part, such as a face. When the site crops the picture for phones, that part stays in view.
- 2 **Copy link** to the file.
- 3 **Suggest with AI** writes alt text from the picture. Check it before saving.
- 4 **Alt text**: what the picture shows, for blind visitors and Google. "A Mjazo pro threading a customer's brows at home", in English and Urdu.
- 5 **Tags**, to find it again.
- 6 **Where it's used**: every page that shows it.
- 7 **Replace file**: swaps the picture everywhere it's used at once.
- 8 **Delete**: only possible when it isn't used anywhere.

Our pictures: real Karachi homes and real pros. Never retouch or lighten skin.

54 of 54 texts translated

Translate the rest with AI

Retranslate everything

- 1 اردو shows or hides the Urdu fields.
- 2 The English text.
- 3 Its Urdu, written right to left.
- 4 How much of this item has Urdu.
- 5 **Translate the rest with AI** fills the empty Urdu fields. Each carries a purple *AI translation, needs review* label: read them, correct them, then click **Mark AI Urdu as reviewed**.

Tools → Urdu translation

Urdu translation

How much of the site has Urdu, and a one-click AI pass for everything still missing. The Urdu site at /ur goes public when you switch it on in Settings → Feature switches.

Whole site

15% in Urdu

286 of 1,967 texts

Publish each one straight away

Translate everything missing (222)

Each translation is saved as a draft (or published, if you tick the box) and flagged "AI translation, needs review" until someone reads it. Prices, phone numbers and {{tokens}} are kept as they are.

Section	Entries	Urdu	Needs review
Company & contact · Settings	1	0%	4
Booking policy · Settings	1	0%	
Plus & referrals · Settings	1	0%	
SEO settings · Settings	1	67%	
Worlds · Catalogue	8	0%	

- 1 How much of the whole site has Urdu.
- 2 **Publish each one straight away.** Leave it off to review the drafts first.
- 3 **Translate everything missing** in one go.
- 4 **Needs review:** AI Urdu that nobody has checked yet.
- 5 Each section and how far its Urdu is.

The Urdu site at /ur goes public when an Owner or Admin switches it on in **Settings → Feature switches**. Before that, a native speaker reads the Urdu, especially prices, policies and anything legal. Changing the English doesn't change the Urdu: update both.

SEO *in the editor*

Most items have an **SEO** section near the bottom of the form: how the page appears in Google and when its link is shared on WhatsApp. Empty fields use the page's own text.

SEO

Overrides the service page's title pattern (Settings → SEO settings).

Google WhatsApp & social 2 English اردو

1 Mjazo
mjazo.pk > services > womens-salon > full-body-wax

3 Full body waxing at home in Karachi from PKR 4,500 · Mjazo
Arms, legs, underarms and stomach/back. Our hero service. From PKR 4,500, all-in. Book across Karachi, pay after.

Empty fields show what the live page uses today (the built-in text). Publish to see changes in Google, usually within days.

4 Search title · 58 characters with the ending (aim for 30–65) Search description · 113 characters (aim for 70–160)

Focus keyword · Add one to check the title and description Share image · The page's built-in image

Search engines · May show this page

5 Suggest with AI SEO score 93 · audited 7 hr ago · 1 to fix 6

- 1 **Google:** the result as Google shows it.
- 2 **WhatsApp & social:** the card a shared link shows.
- 3 The search title and description.
- 4 Checks: green is fine, amber says what to fix.
- 5 **Suggest with AI:** a title, description and keyword to start from.
- 6 The page's latest **SEO score**.

The fields below the checks

Search title	Shown in Google and the browser tab, 30 to 60 characters. "· Mjazo" is added for you.
Search description	The grey text under the title in Google, 70 to 160 characters.
Focus keyword	The phrase the page should rank for, such as "waxing at home Karachi". The score checks it.
Share image	Shown when the link is shared. A JPG or PNG of 1200 × 630 works best.
Hide from search engines	For pages that shouldn't appear in Google.

The SEO *dashboard*

Tools → SEO. How every page scores in search, and what to fix first.

1 Average SEO score

86

380 of 384 pages audited · last 6 hr ago

English اردو **2** Audit all pages

338 good (80+) 42 need work (50-79) 0 poor (under 50) 4 not audited

An audit loads the published page the way Google does and runs 16 checks: title and description, the focus keyword, headings, links, image alt text, amount of text and readability. Drafts don't count until they're published.

4

3 Search pages, addresses or keywords All sections Every page Site order

Page	Score	Top problems	Speed	Audited	6	7
> Home page / · Pages	5 76	Focus keyword Title length +2 more	—	7 hr ago		Audit
> Services menu /services · Pages	71	Focus keyword Readability +2 more	—	7 hr ago		Audit
> Offers & bundles /offers · Pages	86	Focus keyword Description length	—	7 hr ago		Audit

- 1** The average SEO score, and how many pages are good, need work or are poor.
- 2** **Audit all pages:** checks every page again (a few minutes).
- 3** Search pages, addresses or keywords.
- 4** Filter by section or problem, and sort.
- 5** Each page's score: green 80+, amber 50 to 79, red under 50.
- 6** **Top problems** to fix on that page.
- 7** **Audit** one page again after you fix it. The pencil opens its editor.

An audit reads the published page the way Google does and runs 16 checks: title and description, focus keyword, headings, links, image alt text, amount of text and readability. Drafts count once they're published. Once an Owner has switched it on, the whole site is checked again by itself every Monday.

Redirects and *special text*

Redirects

Send visitors (and Google) from an old address to a new one, so links in old messages, ads and search results keep working after a page moves or is removed.

Add a redirect

1

Old address

/old-page

2

New address

/new-page or https://...

3

Permanent (308)

The page has moved. Good: Google moves its ranking to the new address.

Note (optional)

Why it exists, e.g. "Old Eid campaign link"

4

Add redirect

End the old address with /* to move a whole section, and put * in the new one to keep the rest of the address: /tips/* → /blog/*. Urdu addresses (/urf...) follow automatically. Changing a published item's address adds a redirect for you.

5

Where does this address go?

/any-address

Test

Shows every hop, including the redirects built into the site's code.

Redirects

Search addresses and notes

Old address	New address	Type	Visits	Added	
6	/eid-glow	/campaigns/eid-glow	Permanent	3	5 hr ago · Mjazo Support
Added automatically when the address changed					
7	Built into the site				
These are set in the site's code and run before the ones above. A developer changes them.					
/account/plus → /plus	Temporary				

1 Old address, for example `/eid`.

3 Permanent for pages that moved for good.

5 Test where any address ends up.

7 Redirects built into the site, set by a developer.

2 New address: a page on the site or a full web address.

4 Add redirect. It warns about loops and addresses that lead nowhere.

6 Redirects added by themselves when an address changed.

Placeholders: `{{ ... }}`

Some text holds placeholders the site fills in from Settings, so one change there updates the text everywhere. Keep the double braces exactly as they are.

`{{catalog.serviceCount}}` services ·

`{{catalog.areaCount}}` live areas ·

`{{policy.freeChangeHours}}` free-change hours ·

`{{plus.priceText}}` the Plus price.

The italic accent: `*word*`

In headlines, one word in stars becomes the italic accent. Use it once per headline.

Writing *for Mjazo*

- **Warm, confident, a little cheeky, never cheesy.**
Short sentences. Start with the verb: "Book a facial", not "Facials can be booked".
- English with Roman Urdu touches; Urdu where it helps the customer.
- Say **clear prices**, never "cheap".
- **No fake numbers, reviews or urgency.** No "only 2 slots left" unless it's true.
- No whitening or fairness words. Say "brightening facial".
- When a customer is talking to an AI, say so.

OUR LINES

Everything your home needs.
One tap.

Ghar ka har kaam. Pakka.

Verified pros for every corner of your Karachi home, at clear prices you pay after.

Pictures

Real Karachi homes and real pros; soft, warm light. Never retouch or lighten skin. Every picture gets alt text that says what it shows.

Headlines

One idea, said simply, with one accent word in italics: "Glow at *home*". The accent is saffron on light backgrounds; saffron is the only accent colour.

Prices and promises

Write prices as **PKR 4,500**, with "from" when options change the price. Promises (free changes, redo, pay after) come from the booking policy placeholders, so they're always the same everywhere.

When something *goes wrong*

IF...

THEN

You published by mistake	History → Compare to find the right version → Restore → Publish.
A draft is a mess	Discard changes. The live version is untouched.
Something looks broken on the site	Undo the last publish from History, then tell an Admin what you changed (the activity log helps).
Many items went wrong at once	An Owner restores the last backup as drafts and publishes what's right.
A picture is wrong everywhere	Media → the picture → Replace file.
An old link shows "not found"	Tools → Redirects → add one from the old address to the new page.
You can't sign in	Use Forgot password? or Email me a sign-in link. Lost your phone? An Owner resets your two-step sign-in.
Your role can't change a field	Ask an Editor (content), an Admin (prices, settings) or an Owner (people, backups).
You saved over someone's work	You can't by accident: the editor warns you first. If it happened, History has their version.

Questions? Ask an Owner: mjazosupport@gmail.com.
